

# EarnSphere

## Expansion Documentation

---

### Aim

The aim of this document is to include the expansion steps taken by EarnSphere in order to deploy liquidity on different blockchains, decentralized exchanges (DEX) and centralized exchanges (CEX).

---

### ERC20 (Ethereum) Chain

The native chain of the \$ES token, on which the project initially launched on March 15<sup>th</sup>, 2024. This chain uses ETH(ERC20) as its network native token for gas fees. The EarnSphere liquidity on the ERC20 network is found on Uniswap V2 as \$ES/ETH. Taxes apply: 4% on buys and 6% on sells.

\$ES(ERC20) Contract Address:

---

### Base Chain

\$ES expanded to the Base Chain on April 22<sup>nd</sup>, 2024. This chain uses ETH(Base) as its network native token for gas fees. The EarnSphere liquidity on the Base network is found on Uniswap V3 as \$ES/ETH. Taxes do not apply (0% tax). A liquidity fee applies on Uniswap V3 (1%).

\$ES(Base) Contract Address:
